

XERO PLAN, ADVICE AND SUPPORT
FOR YOUR PHARMACY BUSINESS

WE UNDERSTAND THE CHALLENGES YOU FACE

WE WORK WITH PHARMACY BUSINESSES THROUGHOUT THE COUNTRY

Ever wanted more control over your accounting bill? If your pharmacy business has a turnover of less than \$2 million and either currently uses or is considering switching to the standard Xero accounting software package, we offer you a fixed price on your accounting and taxation compliance needs.

We'll guide you through setting up a Xero ledger for your pharmacy and organise appropriate user training. You'll then reconcile bank transactions for all bank accounts on a monthly basis and load all relevant creditor and debtor invoices. Once you've done this, we log in and review the GST returns automated by Xero to see if there are any obvious adjustments required and then pass it back to you to file the returns.

We'll also provide an excel spreadsheet for some monthly journals to be imported to Xero so you can track stock movement and other relevant information. This will help to create management reports through your Xero ledger, allowing you to keep a close and up to date eye on how your business is performing on a monthly basis.
